

## CAREER DEVELOPMENT OPPORTUNITY AT STEADFAST SOLUTIONS

Steadfast Solutions is a company committed to the growth of both the organisation and the individual. We are driven by this value of growth and to provide you with a career development opportunity within Steadfast Solutions.

We are looking to appoint a candidate to the position of  
**CNC PROGRAMMER & OPERATOR**

### THE COMPANY

Steadfast Solutions Ltd is a precision engineering company, offering fully comprehensive in-house manufacturing services. At the core of these capabilities is EDM Wire Erosion & EDM Hole Burning, this being supported by both CNC and Conventional machining.

Due to the nature of our bespoke work, our client base is extremely diverse and spans many sectors including: Aerospace, Automotive, Off-Highway, Commercial Vehicles, Industrial Equipment, Marine, Mass Transportation, Medical & Motorsport.

An opportunity has arisen for a CNC Programmer & Operator to join our small, dynamic and highly focused team at our site in Oldbury, Birmingham.

### THE ROLE

As a CNC Programmer & Operator you'll be responsible for producing bespoke machined parts by; setting up, programming and operating computer numerical control (CNC) machines while maintaining equipment and supplies. You will always strive to achieve the highest quality and safety standards.

This is an exciting opportunity to help shape the future of Steadfast's CNC machining activities.

### THE RESPONSIBILITIES

- Creating and maintaining all CNC programmes and associated data/toolsets.
- Validating programmes to ensure operations have been completed to meet the required quality standards/specification.
- In depth review of CAD drawings liaising with draughtsman, MRP, team leaders and other team members. Extracting the

best method of manufacture and machining process.

- Ascertain all tooling required, liaise with tool manufacturer to fulfil requirements.
- Develop and implement post processors. Work with post processor manufacturer to update any modifications required.

### THE REQUIREMENTS

- Experience in engineering or manufacturing environment.
- Extensive knowledge and practical experience of CNC Programming and Post Processors. Additional experience in Haas CNC Vertical Milling Machines and One-CNC is preferred.
- Able to interpret and understand engineering drawings.
- Able to follow manufacturing instructions/sequences.
- Good communication skills, team player and can work independently using own initiative.

### WORKING HOURS

- Monday to Thursday 7.30am till 4.30am (1/2 hour lunch)
- Friday 7.30am till 12.30pm
- 30 days holiday (inclusive of Bank Holidays)

If you are interested in this exciting opportunity and feel you can fulfil the requirements we would like to hear from you. Please send your CV to Steve Moseley, Managing Director.
