

CAREER DEVELOPMENT OPPORTUNITY AT STEADFAST SOLUTIONS

Steadfast Solutions is a company committed to the growth of both the organisation and the individual. We are driven by this value of growth and to provide you with a career development opportunity within Steadfast Solutions.

We are looking to appoint a candidate to the position of
CONVENTIONAL MACHINIST

THE COMPANY

Steadfast Solutions Ltd is a precision engineering company, offering fully comprehensive in-house manufacturing services. At the core of these capabilities is EDM Wire Erosion & EDM Hole Burning, this being supported by both CNC and Conventional machining.

Due to the nature of our bespoke work, our client base is extremely diverse and spans many sectors including: Aerospace, Automotive, Off-Highway, Commercial Vehicles, Industrial Equipment, Marine, Mass Transportation, Medical & Motorsport.

An opportunity has arisen for a Conventional Machinist to join our small, dynamic and highly focused team at our site in Oldbury, Birmingham.

THE ROLE

As a Conventional Machinist you'll be responsible for producing bespoke machined parts from component drawings to the required standards in the most efficient and cost effective way. You will always strive to achieve the highest quality and safety standards.

This is an exciting opportunity to help shape the future of Steadfast's conventional manufacturing activities.

THE RESPONSIBILITIES

- Produce quality components by programming, setting and operating appropriate equipment.
- Operate conventional Toolroom type machines to make or modify parts.
- Ensure components are both dimensionally correct and the visually aesthetic quality of the finished component is in line with Steadfast's quality standards.

- Solve production and manufacturing problems, referring up to Manufacturing Manager and other team members when necessary.
- Be flexible in operating all equipment and ensure continuous improvement.
- Regulate and maintain machine, tools, jigs and parts.

THE REQUIREMENTS

- Experience in engineering or manufacturing environment.
- Conventional machining background in Milling, Turning, Grinding.
- Experience with one off part manufacture.
- Able to interpret and understand engineering drawings.
- Able to follow manufacturing instructions/sequences.
- Good communication skills, team player and can work independently using own initiative.

WORKING HOURS

- Monday to Thursday 7.30am till 4.30am (1/2 hour lunch)
- Friday 7.30am till 12.30pm
- 30 days holiday (inclusive of Bank Holidays)

If you are interested in this exciting opportunity and feel you can fulfil the requirements we would like to hear from you. Please send your CV to Steve Moseley, Managing Director.

STEVE MOSELEY
